 watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult
 a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.

MISSION BRIEFING

Your mission is to fly behind enemy lines on a mission to destroy XEVIOUS. To accomplish this task, you've been given access to a state-of-the-art Solvalou fighter equipped with anti-aircraft missiles and guided bombs. As you fly over the surface of the planet, the screen will scroll upward and enemy air and ground forces willattempt to shoot you down—destroy these enemies and dodge hostile fire! Use the target reticule in front of your fighter to aim your bombs—it will flash red when it passes over a ground target.

Your mission will take you through several game areas. These areas are divided by a thick band of forest terrain. If you get shot down in the first 70% of an area, you will reappear at the beginning of that area. If you have proceeded past the first 70% of an area and are shot down, you will begin again in the next area.

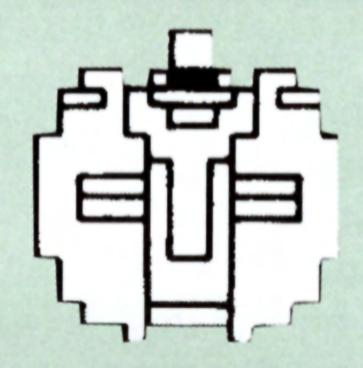

ENEMY AIR FORCES

Talken

Always cowardly, these fighters retreat after attacking.

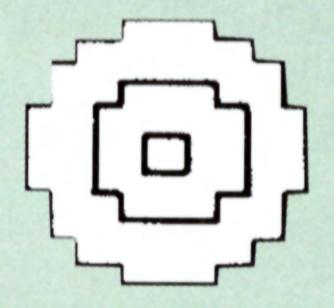

Zkart

Beware of these stealthy fighters that appear out of thin air, fire, and disappear in a flash.

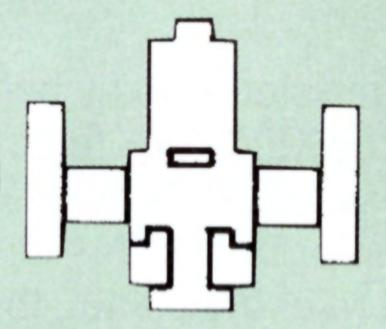

Torroid

These unmanned attack drones will fly at you in waves.

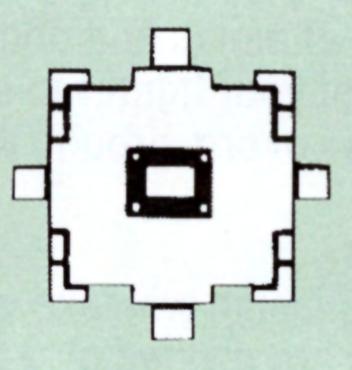

Jiara

These curious fighters swoop at you with a distinctive corkscrew attack.

Zoshee

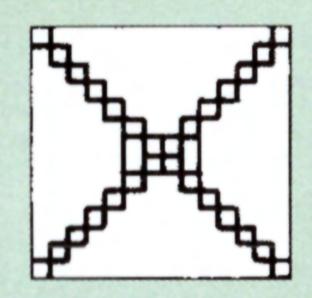

Possessing unknown strike capabilities, these advanced assault fighters are a force to be reckoned with.

ENEMY GROUND FORCES

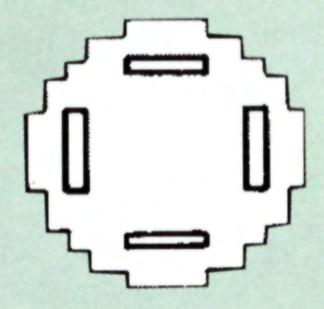

Barla

Obliterate these unarmed buildings with a well-aimed bomb.

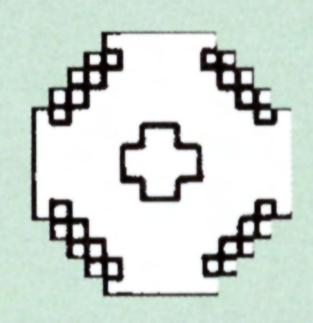

Solbak

XEVIOUS forces have constructed a network of Solbak information nodes—destroy them to slow down enemy production.

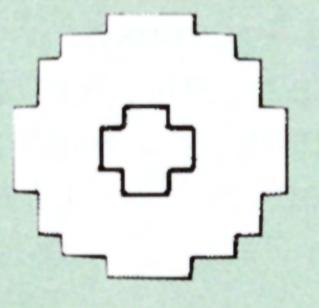

Domogram

These tanks will fire at you while driving along rounds.

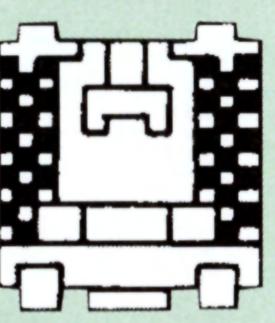

Logram

Firing continuous streams of missiles, these anti-aircraft installations should be approached carefully.

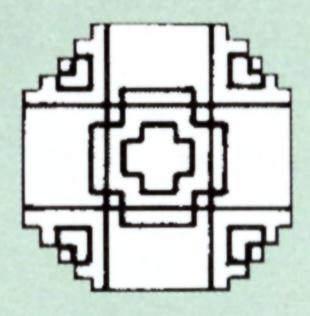

Globber

These unarmed amphibious vehicles make for easy prey.

Deloda

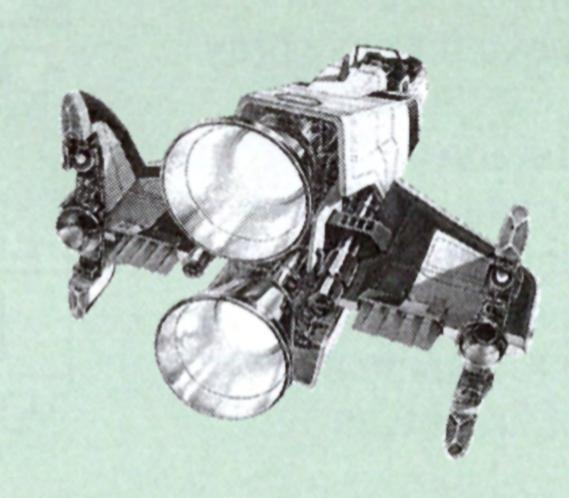

These heavily defended ground installations unleash a fearsome amount of firepower.

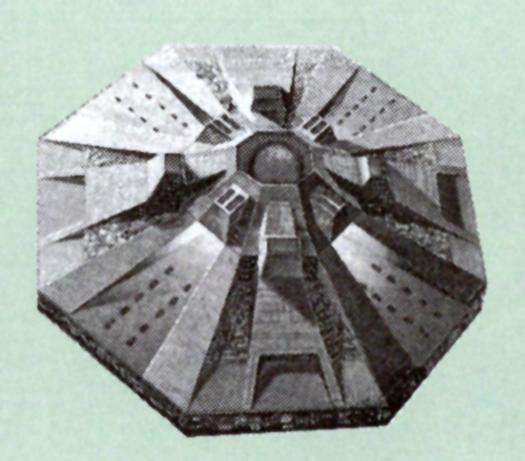

FLOATING FORTRESSES

Ando Ageanesis:

These Floating Fortresses are the backbone of XEVIOUS—attack their core and take them down to complete your mission and destroy XEVIOUS once and for all. Beware of its main weapons port—it can blanket the sky with a hail of lead.

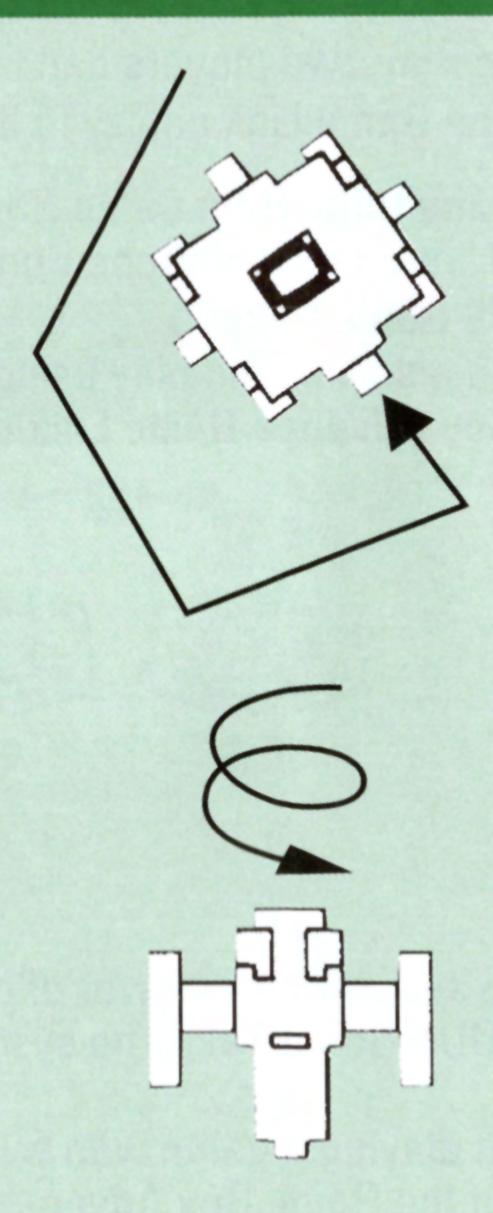

HINTS AND TIPS

As you infiltrate deeper and deeper behind enemy lines, enemy resistance will become more fierce. To counter this stiff resistance, destroy Solbak nodes to reduce the enemy's fighting capabilities and bring the XEVIOUS machine to its knees.

Enemy fighters attack in formations—memorize these patterns and formations and learn the best way to counter them to defeat large numbers of enemies with ease.
